

Agriculture Academy

The Agriculture Academy allows students to explore the wide variety of careers and opportunities in the field of agriculture. These variations include, animal nutrition, animal health and medicine, crop production, meat processing, conservation of natural resources, equipment development and repair, and business management. This field is always changing and advancements in technology are needed to increase production to meet our ever-increasing demands for energy and food. Skills learned in this academy will give students a solid background of the industry at all sectors. This will help the graduate either take over the family business or explore education.
